CS427: Software Engineering Team Contract

Terms of Agreement:

The following is a listing of terms that team 25 agrees to uphold through the duration of the CS427 final project development time:

- We agree that we will participate actively in this class project.
- We agree that we will participate actively in this class project.
- We agree that all members of our team will be present during the demo for each milestone.
- We agree to consistently meet as a team at Saturdays from 1:30 - 2:30 PM each week for the duration of the course project. This is in addition to meeting separately in pairs (if our meetings last long enough that we do all our work and pairing during the meetings, then we don't need separate meetings for pair programming), and this is separate from team meetings with course staff.
- We agree that we will do actual pair-programming and that we will switch pairs regularly according to the schedule given on the team web page.
- We individually agree that we will be in contact with the partner with which we're pair programming on any given week to set up meeting times to work on the project. We also agree that we will follow up on these scheduled times and report our progress on the wiki.
- We agree that we will post our progress frequently on our team's page on the class wiki (individually, as soon as possible after each pair programming session).
- We agree that we will respond to e-mail/calls/etc. from our team members and the staff within 24 hours.
- We agree to report an unresponsive team member to the course staff as soon as problems occur.
- We agree that we will seek help from the staff and not wait until the last minute before the assignment is due.

Signatures of Team Members:

We, the undersigned, agree to uphold the terms listed above through the duration of CS427 final project development time.

- _____   Vikram Jayashankar
- _____   Joseph Ciurej
