CS427 Iteration 2 Meeting Agenda

- Progress of each pair for the current iteration.
- Major problems any pair faced during the current iteration.
- Discuss code details and design for each pair.
- Discuss integration work required between the components developed by the separate teams.
- Arrange pairs for next iteration such that pairs working on an integration of two components have one member from each development team for the two components.
- Evaluate the work distribution for pairs during the next iteration.
- Discuss current user stories and reevaluate progress on stories if need be.
