CS427 Final Iteration Meeting Agenda

- Briefly discuss the primary goal of the project.
- Review the major user stories of the project and discuss their importance with respect to the goal of the project.
- Perform a brief project demo to demonstrate the major features of the Jenkins chat plugin project.
- Brief overview of the major components and overall design of the plugin.
- Discussion and code review of major implementation components by corresponding implementors.
- Walk-through of the project wiki with review of structure and important sections (user stories, iteration progress, et cetera).
- Walk-through of the SVN commit log with evaluation of team member's individual contributions.
- Discussion regarding the future of the project, including future implementations, plans for open-source, and publication as an official Jenkins plugin.
